8 Best practices for online instruction	123

Introduction

This book has been written for the students of educational technology at undergraduate level, but it can also be used by the same students at graduate level and other people interested in the topics covered by educational technology.

The reading comprehension passages at the beginning of each unit tend to be short (between 300 to 700 words) since the author finds long passages boring and time consuming.

The topics in each unit are independent of other units and can be studied separately, however, the grammar and dictionary sections follow a procedural order and use, are recommended to read each section in the previous unit before moving to the least of the least o

Unlike other SAMT publications, this book follows a relatively different format. or instance,

- the second reading comprehension passage has been omit
- the number of units has been reduced to ten
- true- false reading comprehension exercise have be no tree.
- three new sections namely puzzles, jokes, and use of phonology in language learning have been added to each unit

Good appendices have been added to the end of the broken namely list of vocabulary items used in

- reading comprehension passages
- parts of speech exercises
- vocabulary exercises

Having published the book "E. "In for the students of information technology," the author hopes that this book also in its the requirements and satisfaction of the readers. Users of the book, as use a kindly requested to send their constructive comments and improvements to the unit a dress of the author:mirzaeian224ATyahoo.com
