Dear Colleagues and Friends,

It is our pleasure to invite you to attend the Second International Congress on "ROAD SAFETY" which will be held in Razavi Hospital, Mashhad, Iran from 13-14 February, 2013. Following the successful congress on 2012, once again in collaboration with the World Health Organization, Iran Police Traffic Office as well as the best specialists from all around the world, we aim to bring together a group of globally recognized experts in order to reduce the casualties and disabilities due to road accidents.

Furthermore, Iran and neighboring countries have a very high rate of road accidents with thousands of victims per year. In last 20 years, more than half a million Iranian were killed in road accidents; millions suffering from injuries. Road accident is a serious problem throughout the world, in social, health and economic terms. It is said that road accidents commonly is the second largest cause of deaths for economically active people (5-44 years) in many countries.

This congress will present current research and best practice in road safety especially on education, enforcement, engineering and the road environment as well as innovation, progress and new directions in road safety policy, planning, research, practice and evaluation.

We are very much looking forward to welcoming all of you to the Second Annual Road Safety Congress here in Mashhad.

Sincerely,

Dr. Saeed Abdolhosseini
CEO of Razavi Hospital

Prof. Dr. Ali Gorji
President of the Congress
