## Preface

In today's world, communication is a very important element in achieving sustainable development. Communications have an important role in the exchange of scientific knowledge and many countries in the process of communication have gained the knowledge by applying other countries experiences.

The main factor for communication is language. Mastery of the language (especially English languages ) can make a significant contribution to the exchange of knowledge between communities and thus can have great impact in improving the level scientific and technical knowledge.

Dictionaries of appropriate resources are linking between communities and countries, with different languages. Therefore every country is trying to be prepared in specific areas of specialized dictionaries. This dictionary can help the students of variety filed of study to advance and develop their level of language and technical knowledge. It also can help students in translation the scientific articles and making communication with the world.

The preparation of climatological terminology handbook is important in Iran, as the vast part of the country covered with arid and semi-arid climate, and each year affected with natural disasters, such as drought, floods and etc. Thus language communication can assist in planning, decision-making and carrying out activities related to crisis management and disaster with minimum cost. It can help student and organizer in the related filed such as meteorological organization, water resources and agricultural planning.

To compile the dictionary, 2 years' time spent and several sources were used to compile the set ahead. There is no doubt this series of shortcomings associated with it, the comments of scholars and students can continue the honorable way started an important help to reduce deficits and make improvement in next edition.

We take this opportunity to acknowledge the assistance and cooperation of colleagues in Hakim Sabzevari University. We hope that this introduction is to provide the most relevant tasks in the future.

Dr. Mokhtar Karami

Mehdi Asadi, Ph.D. Student
