# Preface

Hi, I'm Mahbubeh Nakhaei the director of Enjoy Learning English (ELE) system and the collector of the lessons.

I believe we have the most complete English speaking system for adult learners. Today learning English is a necessity for each person, in many situations in your life you need to know English as an international language. Probably you've seen those who always look for the best and fastest way to improve quickly their English. Many students ask: "how can I improve my English? My grammar is so bad I HATE GRAMMAR, what is the easiest way???" here's the answer, Enjoy Learning English system (ELE) It is not advertising, because if you really follow this method your English, your 4 skills, will improve.

In this system you never study grammar rules, you never memorize boring vocabulary lists, and you never take tests. You will learn English quickly, effortlessly and automatically. I'm sure that if you really follow this method, it will work.

I know many excellent English speakers in Iran and other countries that used these lessons, they never studied in university they never went to grammar classes, but they just used listen and response lessons. We know that most of our students have problems with their listening skill, their speaking is not so good but they can read or write very well, because they learnt with their eyes not their ears and another problem is that there isn't any native English teacher here in our city or country, I know that we have a lot of skillful professors and teachers of English but their first language is not English.

By considering all of these problems I found that it is better to learn English from a native English teacher who knows everything about their cultures, languages, idioms that they use...etc.

In my ELE great, fabulous, effortless system you have 4 English teachers: AJ Hoge, Kristin Dodds, Joe Weiss and Paul Gruber. Your main teacher is AJ Hoge who is the number 1 teacher in the world.

And here I have a special thanks to Dr.Khalil Motallebzadeh who is dean of the Tabaran University and helped me to improve my ELE.

For more information click on "how to use the lessons?" and use your e-mail to contact me. I like to see your comments.
