Chapter 3: Acupuncture in Iran	35
3.1. History of Acupuncture in Iran	35
3.2 Acupuncture specialists in Iran	36
3.3. Iranian Publications on Acupuncture	36
3.4. Iranians' Tendency towards Acupuncture	37
3.5. Frequency of the Keyword "Acupuncture" in Google	38
3.6. Acupuncture Clinical Trial in Iran	41
Chapter 4: Principles of Clinical Trials	55
Introduction	55
Chapter 5: Principles of Clinical Trial in Acupuncture	59
5.1. Experimental Design Considerations in Evaluation of the Efficacy of Acupuncture	59
5.2. Acupuncture Points (Acupoints)	60
5.3. Types of needles	60
5.4. Needling depth	61
5.5. Needling duration	61
5.6. The number of acupoints	61
5.7. Stimulation	61
5.8. Acupoint Selection	62
5.9. Frequency and number of acupuncture sessions	62
5.10. Significance of a control group in acupuncture experiments	62
5.11. Blinding	64

5.12. Standards for reporting the interventions in controlled trials of acupuncture (STRICTA)	66
Chapter 6: 45 Substantial Criteria of Good Clinical Practice (GCP) in Acupuncture.....	69
6.1. Stating the research question clearly; how methodology can respond to the research questions.....	69
6.2. Obtaining informed consent forms	70
6.3. Describing informed consent.....	70
6.4. Homogenous sampling, describing inclusion and exclusion criteria....	70
6.5. Classification	70
6.6. Randomization	71
6.7. Describing treatment methods	71
6.8. Patient blinding.....	71
6.9. Dividing treatment groups	71
6.10. Blinding evaluators.....	71
6.11. Blinding the data collectors	71
6.12. Comparing demographics of the members of control and intervention groups.....	72
6.13. Explaining the reasons for excluding a potential participant.....	72
6.14. Getting an adequate sample size.....	72
6.15. Calculating the sample size	73
6.16. Calculating the sample size based on the research data	73
6.17. Missing cases.....	73
6.18. Describe the acupuncture process.....	74
6.19. Report descent review articles	74
6.20. The adequacy of treatment methods used.....	74
6.21. Status of the acupuncturist.....	74
6.22. Introduction to the articles	74
6.23. Correct use of shams.....	75
6.24. Using conventional treatment in the control group	75
6.25. Monitoring compliance with therapeutic guidelines	75
6.26. Utilizing conventional treatments in the intervention group	76
6.27. Leaving the intervention group untreated.....	76

6.28. Generalizability of the results	76
6.29. DNIC: Diffuse Noxious Inhibitory Controls	77
6.30. Controlling non-specific effects of treatment at the evaluation.....	77
6.31. Acupuncture validation.....	77
6.32. Acupuncture reliability	78
6.33. Follow up of 3 months or more after the treatment	78
6.34. Description of the final outcome	78
6.35. Description of the final outcome based on statistical analysis	79
6.36. Comparison of the commencement of the therapeutic effect	79
6.37. Comparison of the duration of therapeutic effect	79
6.38. Mention the follow-up duration for evaluative purpose	79
6.39. Assessment of the patients' withdrawal and drop-out presentation	80
6.40. Evaluation of the results of the repeated experiment.....	80
6.41. Medicine consumption.....	80
6.42. Tracking parallel treatments	80
6.43. Tracking the participants' daily activity.....	81
6.44. Highlighting the side effects.....	81
6.45. Acknowledgement of the sources of funding in the study.....	81
Chapter 7: World Health Organization Studies on Acupuncture	87
7.1. Introduction.....	87
7.2. The therapeutic effect of acupuncture on pain.....	90
Chapter 8: Evaluation of the Effectiveness of Acupuncture Based on the Studies of Cochrane Systematic Reviews on Treatment of Diseases	127
8.1. Systematic review and its significance	127
8.2. A systematic review of studies conducted on acupuncture in the Cochrane Library	130
Chapter 9: Comparative Study of Cochrane Database and WHO.	157
Appendices.....	161
Appendix A. Acupuncture Figures	163
Appendix B. Articles reviewed by the Cochrane study group	187
Appendix C. Articles reviewed by the World Health Organization	191
Appendix D. Published articles based on the current book	197
