Preface

I have written this book in the hope that it will present the most important basics of tourism concepts and affairs in the world. There are many places in the world may nobody can visit all places. The first division is on continents and oceans. Besides oceans; imagine there are how many countries in every continent and within each country how many cities and within each city how many villages to visit. Tourism itself has a large range of branches that is difficult to cover all topics; therefore; this book maintains a view of the origin of tourism, who is a tourist, what is tourism, different types of tourism, the impact and dimensions of tourism, the jobs in tourism and the places to visit. And each part has some questions to discuss and review based on what you have read to help you to remind the material of the text better.

This book is welcomed by students and teachers. It can be used as a course of study in reading, translation and specified courses in university in English majors and the Tourism major specifically and as a general course of study in other majors.

I am extremely glad that I have thought this course and the material of the book is helpful for the aim by received comments and information.
