Preface

Speaking is probably the language skill that most language learners wish to perfect as soon as possible. Developing textbook for improving oral skills of learners has been a long term goal which is prepared for the teachers as a source so the EFL learners can have a flexible and dynamic nature language in an instructional framework. Finally the demanding of EFL learners in learning English convinced me to develop a textbook that is more compatible with the needs of them. The author has tried to choose the challenging topics. Those topics that English language learners are supposed to have more information and ideas about. So it is some sort of topic based instruction. In topic based conversation classes, it is expected to discuss around a topic by using strategies to get more purposeful. So the student's preparation before starting speaking is a necessary means of warm up. About the topics due to the socio- cultural limitations of my country the chosen topics are broad enough and cover various interests.

Real Talking a unique and helpful book which aims at improving speaking skill in an innovative method. This book can be used in free discussion classes or any English class whose focus is mainly on speaking. The author does not expect this book to be regarded as a course book, but as a subsidiary book, it will be helpful. What prompted the author to write this book was the fact that there were few books available to teachers and learners of English providing them with appropriate material for free discussion. In this book, it has been tried to use controversial issues along with various strategies which have profound meaning so that students can come up with a lot of new ideas and talk about them easily during the class time. Besides, the questions placed after each topic are controversial and can delicately raise a heated discussion. This book is a good means to give you many opportunities to learn and practice English; this book will certainly help you improve your speaking skill.
