Notice

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our knowledge, changes in practice, treatment and drug therapy may become necessary or appropriate. Readers are advised to check the most current information provided (i) on procedures featured or (ii) by the manufacturer of each product to be administered, to verify the recommended dose or formula, the method and duration of administration, and contraindications. It is the responsibility of the practitioner, relying on their own experience and knowledge of the patient, to make diagnoses, to determine dosages and the best treatment for each individual patient, and to take all appropriate safety precautions. To the fullest extent of the law, neither the Publisher nor the Authors assume any liability for any injury and/or damage to persons or property arising out of or related to any use of the material contained in this book.

About the cover.

Professor C. Michael Gibson is well known in interventional cardiology for his many contributions to clinical science. He has had leadership positions in many pivotal clinical trials that have influenced our practice and guidelines. He originated the TIMI myocardial perfusion grade. He currently leads the Baim Institute for Clinical Research, an academic research organization at Boston's Beth Israel Hospital. Beyond his investigative prowess, Professor Gibson is an unusually talented artist. The editor-in-chief was delighted that he agreed to provide art for the cover for this 12th edition of Braunwald's Heart Disease. This addition is particularly appropriate because of Dr. Gibson's longterm association with Dr. Braunwald's research in ischemic heart disease. The editors are proud to have his artistic rendition of the now classic Heart Disease logo grace the cover of our book.
