Preface

Today, we are proud to present an advanced academic reference book for Microbiology Terminology.

The academic book of "Linguistica Scientifica" contains a wide range of microbiology terms which are needed for microbiologists.

This book is aimed for everyone who studies Biology, Medicine and Microbiology with elementary level of English.

The didactic method used in this book helps the reader to learn and teach in confident manner.

It took 3 years to write this book as a high qualified academic learning and teaching reference.

The content of "Linguistica Scientifica" covers different structural aspects in Microbiology Terminology.

We tried to use a logic hierarchical methodology in the present book to increase and ease the reader's understanding.

"Linguistica Scientifica" is a well-designed academic reference book to overcome the reader's overwhelming and confusion. This book is consisted of eight chapters including Language Evolution (Chapter I), Introduction to Terminology (Chapter II), Pronunciation (Chapter III), Multi-rules for Plural formation (Chapter IV), Molecular Structure of a Cell (Chapter V), Cell Biology (Chapter VI), Microorganisms and Microscopes (Chapter VII), and Check your Scientific Terminology (Chapter VIII) in which the first four chapters explain the origination and basic principles of languages, word parts, terms and Scientific Terminology; the second three chapters make the reader familiar to Microbiology Texts, and the last chapter reviews the reader's knowledge through various exercises.

The bibliography of the present book is according to Vancouver style, as the numerical referencing system.
